Wood Floor Cleaning

**Clean, Shine, and Protect
Without Sanding!**

Keep Your Wood Floors Looking Beautiful with Oxi Fresh!

PROTECT YOUR INVESTMENT

Wood floors are a wonderful and valuable part of your home, and they deserve the best care possible. That's what Oxi Fresh is offering you!

Our powerful but safe cleaning system can make your floors look years younger by removing embedded dirt and restoring a gorgeous finish.

What's even better is that you'll be back on your floors fast. After a cleaning and refinishing, you can walk on the floor after only two hours and have normal foot traffic in just one full day!

HOW OXI FRESH CLEANS WOOD FLOORS

For decades, the only way to truly deep clean a floor was to sand it down and start again. With Oxi Fresh's revolutionary system, that's no longer necessary.

But what exactly happens during one of our wood floor cleanings?

Any loose debris is removed with a thorough vacuuming.

We then pretreat the floor and clean it, breaking down and extracting oils and dirt.

The wood floor is treated again, removing residues and leaving the floor spotless.

The floor is then carefully and meticulously refinished to create a gorgeous finish.

SEE WHAT OXI FRESH CAN DO FOR YOU!

A lot of people think their floors are nice and clean - **but here's an example of what we've removed from a "clean" floor.**

A dirty wood floor may look "normal" because people get used to oils and dirt hiding its natural beauty.

Don't let this happen to your floors - keep them clean with Oxi Fresh!

OXI FRESH
CARPET CLEANING®

NOT JUST FOR SOLID WOOD

Have an engineered wood floor? Oxi Fresh can clean it! Have laminate or vinyl? We clean those too, and they don't even need to be refinished to look great again!
